- MS Viso Mapping
- Audit and ISO 9001
- order-to-cash/delivery cycles optimization
- KPI Dashboards

Primary Function 1 [Quality and Operations Process Improvement]

- **Gain Insights and Contribute** towards defining current state issues & future state KPI requirements for Successful delivering Transformations focusing future state KPI requirements for Successful delivering of the improvement outcomes **best operations delivery and end customer experience** focused on accurate data driven approach

- **Strategizing, Designing, Planning, Resourcing,** and managing the organizations Business Improvement pipeline, technology roadmap and digital strategy including the planning, prioritization, **and delivery methodology.**
- **Accountability for delivering the** expected value from enterprise-wide business change and transformation whilst directly supporting line management **and operational teams.**
- **Deploy Improvement Strategies** / Methodologies, **Root Causes Analysis** techniques to identify systems creating **risks** to **Transformation program** contractual commitments.
- **Develop key Analysis, Strategic Advisory** and lead the effort for organization to translates its corporate strategy and goals into actions, lead transformation change programs, leveraging **technology** project delivery (ERP, **CRM**, Safety Systems, Financial, PMO, Value , Benefits, Integrated Reporting) and innovation to reduce complexity. and **manual** processes to impact **turnaround times** & **accuracy** (first time right) of service deliveries to the end **customers of the service in community** along with organization wide People change management
- **Implement efficient project management reporting by configuring cost and schedule variance reports.** Enhance the PM reporting dashboard with streamlined Setup Cost and Schedule variance insights, facilitating **quicker and more comprehensive project health assessments.**
- **Develop strategies in** Supporting the Executive Leadership Team (ELT) in embedding the requirement for continuous improvement and transformation into every team's KPIs.
- **Reduce inefficiencies** in the Projects delivery & process using **PDCA**, Value Stream Analysis and VA/NVA segregation, Method Study
- **Deliver Process, Systems. People Multi system Integrated reporting requirements** for maximum visibility reviews and establish key requirements in li**ne with transformations and strategic objectives.**
- **Develop & Lead Project Delivery Ecosystem** by setting up cross functional collaboration or teams (**organization structures**) by patterning Corporate Leadership, SME, Analytics, Operations, Change group, Business Operations, IT/ICT, Training, Suppliers Customers, Subcontractors, Supply Chain, Logistics, partners etc.
- **Setup/ Improve PMO Governance,** Reporting, Visibility, Collaboration and eliminate all the operational risks involved in accurately delivery on Contractual KPI's **(**Project Planning, Project Execution Management, Reporting, Project **Risk** Management, Project **RAID** Logs (risks, actions, issues, and decisions**)** , Workplace Safety Supply Chain, Material Accuracy, Project Management, Document Version Control), Accounts, Payroll, using modern **integrated digital** tools maximize **technological and corporate investment via effective GRC framework (Governance m Risks and Compliance)**
- **Deliver Accurate, precise and repeatable, reproducible Integrated reporting framework** for PMO planning, financial performance and operationalized KPI's and **value realization through service delivery and cost savings linked to strategic expectations**
- **Develop best in class** approach to track your **project budgets, Variations, quotes, cashflow** tasks, resource management through Red-**Amber**-**Green** Dashboards and **Critical path** dashboards, Reduce Project (Residential, Commercial, Civil) Cost Over Run resulting from **Variations**

- **Develop Documentation management** system to oversee timely, accurate and version-controlled documentations is releases in line to reporting framework with maximum **GRC (Governance, Risk and Compliance)**
- **Develop proactive culture** via **MS teams** auto-**notifications**, **integrated** reporting, collaboration, productivity, and efficiency in organization through broad range of tailored-to-your-project-management-needs digital solutions to achieve best utilization of the project teams.
- **Centrally** manage via modern digital tools all the safety procedures/ surveys, insurance certificates, licenses, plans, manuals, 3D-models, drawings, approvals, condition reports, project variation, invoice, quotes with latest version control with minimal admin support.
- **Setup** visibility in the organization through **HSEQ** instilling **LTI, LTIIR, LTIFR, NLT, FAC Reporting** Dashboard, **Environmental** policy and tailored-to-fit project management, workflows to timely **resolution and prevention, safe COVID-19 check in and check out, site sub-contractor management solutions, Map CYBER and physical Security threats against business continuity plans**
- **Setup Digital Process** for accurately and on time **reporting** and remediation of workplace health and safety, program and portfolio management **integrating SAP, Salesforce, HubSpot, Primavera, Smartsheet, Qlik, PowerBi, Tableau**, focusing delivering **projects** such that **Service commitments**, Project Scope, Budget, and timelines are met with full **visibility** of Project Execution

- **Develop Key Change Management plan** for close operation handover of the reporting methods developed and with effective change adoption across **stakeholders' groups with, Project Management, Project Execution, field services, field installation, Warehouse, Admin, Procurement, Logistics, Covid workplace safety**
- **Implement and gain higher utilization** of modern business ICT Reporting tools and productivity tools such that operational efficiency targets are met
- Define clear and efficient **reporting** requirements for effective KPI like, **Delivery Accuracy, Project budgets,**
- Develop and define the project visibility using **Lean visual management tools** (**Red, Amber, Green**) Category to avoid mix up of New and used components and time losses, double handling
- **Analyze, Plan, Strategize and Project Manage**, deliver the overall direction of the delivery Goal/ outcome, and bring a large cross functional stakeholder onboard and come up with a joint vision for improvement via a consultative and collaborative workshop.
- Championed trials / implementation for large scale improvement project using **Tailored fit-for-purpose Lean Six Sigma** business tools with and achieved high level of engagement & acceptance from the staff members from bottom – top levels and achieved sustainable, repeatable, and reproducible practices using (**SOPs with clear responsibility, accountability**) and successful results helped others continue the ongoing journey of improvements.
- Develop and utilize the cutting-edge digital tools to help boost the productivity like **CRM, workflow integrations, CoBot, Spend Management**
- **Thorough implementation and reporting via** modern & live Dashboards for highest accuracy when it comes to follow up actions **in a constructive and consultative manner**

- Identifying, scoping, and assessing opportunities for **improvement** in the **Current state** (As-Is maps) and develop **Simplified Future State** models (To-be Maps) with **quicker turnarounds,** higher quality, low risk business systems.
- **Project Managed** right from inception through to delivery with several planned **SMART** initiatives with **accurate Business Case** and with **highest possible change** adoption within schedule and budget with efficient project management practices and collaboration
- Facilitate cross function, many varied stakeholders' wide **workshops** focussed on **human cantered design, using design thinking** to build consensus on new strategy, digital solution for organisation wide acceptance and success with repeatable positive outcomes for customers for permanent revenue growth and profit margins
- Develop and implement, **business case, roadmap, capability assessments, approvals, address** request for commercial quotes and financials in regard to evaluating ICT software packages, stakeholders' engagement / approvals, develop use cases and managing their deployment in the journey of business transformation through digitalization and API Integrations
- **Deliver in Collaboration with IT/ICT teams to ERP Improvements** / **integrations** to facilitate high accuracy of transactions and eliminate process delays, excessive steps, over processing, training issues, quicken the service delivery / address within-the-stages-of-process-functions-communication issues
- Deploy highly effective, practical, and tailored-to-fit **OCM** (Organizational Change Management) process with various stakeholder's groups like, **Team members, team leaders, Operation Manager, General Managers, Safety managers, Analysts, Production, Logistics Staff, Asset Engineers, Quality Assurance, Regulatory , ICT staff Members, Supply Staff Members, Filed Technicians, Project Managers, Program Managers, Marketing and HCM (Human Capital Staff), Contact Centers, CIO, CTO, CFO, CEO**
- **Successful Technological Delivery on Seamless integration with your existing Productivity Tools** like Procore, iSafetyFirst, lucidity software (**HSEQ/WHS/Safe**ty) **Monday Dot com**, **Smartsheet**, Office 365, OneDrive/Dropbox/Google Drive, MS Project, JIRA, **ServiceNow**, and **ERP**/**CRM** systems like SAP, Blue yonder, Manhattan, Oracle JD Edwards, **CRM Salesforce, HubSpot**. **Payments** (PayPal/Stripe) **Accounting** (Xero/ MYOB/QuickBooks), Payroll and **Hiring** (Workday/Zoho/Sage/Key Pay), **SharePoint**, **Financial** Dashboards through (**PowerBi/QlikView/Tableau**) and more for Live & **maximum visibility and reporting**

Primary Function 2 [End-to-end Change Management Delivery]

- **Developed and Executed Collaborative OCM Strategy: Spearheaded** the design and execution of a comprehensive Organizational Change Management (OCM) strategy, aligning it with business goals. Collaborated closely with leadership, stakeholders, and diverse teams, including team members, leaders, and department heads, to ensure a unified approach. Integrated benefits realization principles to measure the actual value gained from the implemented changes.

- **Engaged Stakeholders through Collaboration:** Fostered effective communication and collaboration by actively engaging with team members, leaders, and key stakeholders across departments. Utilized design thinking to facilitate collaborative sessions that gathered insights into their needs, concerns, and expectations. Ensured a holistic approach to change management by maintaining open lines of communication and collaboration.
- **Designed and Delivered Collaborative Training Programs: L**ed the design and delivery of targeted training programs tailored to the specific needs of different stakeholder groups. Collaborated with leaders, managers, and various staff categories to develop training matrices that tracked individual and team progress. Emphasized benefits realization through effective people training and onboarding, promoting a collaborative learning environment.
- **Conducted Collaborative Change Impact Assessment**: Conducted thorough change impact assessments in collaboration with cross-functional teams to identify potential disruptions and challenges across different departments. Integrated feasibility trials and collaborated with stakeholders to assess the practicality of proposed changes. Designed collaborative training programs to address knowledge gaps and maximize adoption, focusing on benefits realization.
- **Crafted and Executed Collaborative Communication Planning**: Crafted and executed communication plans collaboratively, conveying the purpose, benefits, and progress of organizational changes. Utilized design thinking principles in collaboration with diverse stakeholder groups to ensure clarity and engagement in communication materials. Incorporated benefits realization metrics collaboratively to measure the effectiveness of communication efforts.
- **Managed Resistance through Collaborative Approaches**: Proactively identified and addressed resistance to change collaboratively among various stakeholders. Utilized effective collaboration strategies to overcome objections and foster a positive mindset. Worked closely with leaders and teams to implement collaborative solutions for resistance management, emphasizing benefits realization and successful adoption.
- **Utilized Data for Collaborative Decision Making**: Collaboratively utilized data and analytics to assess the impact of change initiatives on productivity, employee satisfaction, and key performance indicators. Applied design thinking principles in collaboration with cross-functional teams to analyze data and make informed decisions. Incorporated benefits realization metrics collaboratively to evaluate the actual value achieved.
- **Facilitated Cross-functional Collaboration: Facilitated** collaboration and coordination among diverse departments, such as Production, Logistics, Quality Assurance, and ICT. Ensured that change initiatives were seamlessly integrated into daily operations and aligned with each department's unique requirements. Emphasized benefits realization through cross-functional collaboration, fostering a collaborative culture across the organization.
- **Established Feedback Collection and Analysis Mechanisms Collaboratively**: Established mechanisms for gathering feedback collaboratively from stakeholders at various levels. Applied design thinking collaboratively to analyze feedback and identify trends, concerns, and areas for improvement. Utilized benefits realization metrics collaboratively to assess the impact of feedback on the success of change initiatives.
- **Drove Collaborative Continuous Improvement Initiatives**: Drove a culture of continuous improvement collaboratively by identifying opportunities to enhance the OCM process. Collaborated with stakeholders to implement lessons learned from previous change initiatives and applied design thinking collaboratively to iterate on strategies. Emphasized benefits realization through ongoing collaborative improvements in the change management process.

- **Led Collaborative Leadership Alignment Workshops**: Conducted workshops and sessions to align leadership teams collaboratively, including CIO, CTO, CFO, and CEO, with the overarching change objectives. Facilitated discussions collaboratively to ensure top-level support, commitment, and active involvement in driving successful organizational change. Integrated benefits realization principles into collaborative leadership alignment strategies.
- **Developed and Implemented Collaborative** Crisis Communication Planning: Developed and implemented crisis communication plans collaboratively to address unexpected challenges or resistance that may have arisen during the change process. Anticipated potential roadblocks collaboratively and equipped leadership with strategies to navigate and mitigate crises effectively. Incorporated design thinking collaboratively to create agile crisis communication plans focusing on benefits realization.
- **Collaborated on Technology Adoption Strategies**: Collaborated with ICT staff to develop strategies collaboratively for the seamless adoption of new technologies. Ensured that technological changes were integrated smoothly, and employees were adequately trained to leverage and maximize the benefits of new systems. Integrated benefits realization metrics collaboratively to assess the impact of technology adoption on organizational goals.
- **Defined Metrics and KPIs Collaboratively**: Defined and established metrics and KPIs collaboratively to measure the success of change initiatives. Collaborated with different departments to develop performance indicators that aligned with organizational goals and provided a clear understanding of the impact of change. Incorporated benefits realization metrics collaboratively to assess the actual value achieved from implemented changes.
- **Implemented Employee Well-being Initiatives Collaboratively**: Implemented initiatives focused on employee well-being during times of change. Collaboratively developed programs to support mental health, provided resources for coping with stress, and created a positive work environment collaboratively that encouraged resilience and adaptation to change. Applied design thinking collaboratively into employee well-being initiatives, emphasizing benefits realization through improved morale and productivity.
- **Managed Documentation Processes Collaboratively**: Leveraged knowledge collaboratively to establish and manage comprehensive documentation processes for major projects. Conducted stakeholder analyses, change impact analyses, and business readiness planning collaboratively. Integrated benefits realization principles collaboratively into documentation processes to measure the tangible outcomes of the implemented changes.
- **Led Collaborative Facilitation and Collaboration Sessions**: Demonstrated excellent communication skills by leading collaboration sessions and workshops. Facilitated discussions collaboratively among diverse stakeholder groups to gather insights, address concerns, and foster a collaborative atmosphere conducive to successful change management. Incorporated design thinking collaboratively to enhance collaboration sessions and emphasize benefits realization.
- **Developed Collaborative Communication Materials**: Showcased strong communication skills by creating compelling and effective communication materials collaboratively. Developed clear and concise content for presentations, business documents, and other collateral collaboratively that conveyed the purpose, benefits, and progress of organizational changes to various stakeholders. Applied design thinking principles collaboratively to create engaging communication materials, emphasizing benefits realization.
- **Created Collaborative Business Documents**: Applied communication expertise to produce well-crafted business documents collaboratively. Drafted reports, plans, and other essential documents collaboratively that articulated key information related to change initiatives, ensuring

clarity and alignment with organizational goals. Integrated design thinking collaboratively to enhance the usability and effectiveness of business documents, focusing on benefits realization.

- **Delivered Actionable Communication Collaboratively**: Utilized effective communication skills collaboratively to deliver actionable information to diverse audiences. Presented complex concepts in a clear and understandable manner during workshops and sessions collaboratively, ensuring that stakeholders were well-informed and engaged in the change process. Applied design thinking collaboratively to enhance the delivery of actionable communication, emphasizing benefits realization.
- **Applied ADKAR Prosci Change Management Collaboratively**: Incorporated ADKAR Prosci Change Management principles collaboratively into change initiatives. Utilized the ADKAR model collaboratively to assess and address individual change readiness, fostering a systematic approach collaboratively to ensure successful adoption and implementation of organizational changes. Emphasized benefits realization collaboratively through the application of ADKAR principles.

Achievements:

1) Improved the project delivery cycle by saving **10% of the non-value-added** activities lost in poor communications and setup repeatable / reproducible outcomes using **Smartsheet**
2) Setup Cost, Schedule **variance** reports for faster Project Management **health reporting in Smartsheet**
3) Improved the project delivery cycle by saving **10% of the non-value-added** activities lost in poor communications and setup repeatable / reproducible outcomes using Digital **Project Delivery Dashboard**
4) Setup Cost, Schedule **variance** reports for faster Project Management **health reporting in PM reporting Dashboard**
5) **Process Efficiency Enhancement:**
   Implemented Lean Six Sigma methodologies, resulting in a 20% reduction in average handling time (AHT) for customer support requests.
   Improved operational efficiency measured by a decrease in AHT, contributing to a more streamlined and responsive customer support experience.
6) **Digital Transformation Impact:**
   Led the successful rollout of new digital support channels, driving a 15% increase in customer interactions through digital platforms within the first quarter.
   Demonstrated the positive impact of digital initiatives on customer engagement, measured by a quantifiable increase in interactions on digital support channels
7) **Optimized Reporting Processes:**
   Reduced report generation time by 25% through automation, measured by the average time taken to produce key reports.
   Achieved a 20% increase in reporting efficiency, measured by the number of reports generated per hour of work.
8) **Enhanced Data Accuracy and Consistency:**
   Reduced data errors by 30%, measured by the percentage decrease in data discrepancies across reports.

Improved data quality by 15%, measured by the reduction in formatting inconsistencies within reports.

9) **Strategic Insights Delivery:**
Contributed to a 15% increase in marketing campaign effectiveness, measured by the improvement in customer engagement metrics resulting from data-driven insights.
Achieved a 10% growth in revenue through strategic insights, measured by the percentage increase in revenue directly attributed to data-driven recommendations.

10) **Implementation of Advanced Analytics:**
Improved demand forecasting accuracy by 20%, measured by the reduction in booking errors resulting from the application of advanced analytics.
Successfully integrated predictive analytics into reporting, leading to a 25% reduction in customer service inquiries related to booking discrepancies.

11) **Cross-Functional Collaboration:**
Fostered a data-driven culture with a 30% increase in the adoption of interactive dashboards across departments.
Enhanced data accessibility by 40%, measured by the percentage increase in cross-functional teams utilizing centralized reporting tools.

12) **Developed and Lead a Team which achieved** reduction in **Delivery accuracy** 59 % to 100 %, operational productivity from improvement (**Measured Dollar Impact**) **Operations** services projects with high engagement, adoption from staff members by deploying Best in class Automation , Visual Management tools.

13) **Coached and Mentor more than 40 plus members in continuous improvements tools and processes such** that sustained outcomes are achieved independently with in one of the largest facilities of Australia.

14) **Setup New Customer and New Business customer onboarding process such that time delays are** cut down from few weeks to few days which is more **than 200 % reduction in wait times** and cross functional losses **impacting revenue** growth and cost reduction goals

15) **Reduce Excessive errors within Major ERP** systems affecting the overall deliveries and penalty cost to 100 % accuracy.

16) **Setup New Customer and New Business customer onboarding process such that time delays are** cut down from few weeks to few days which is more **thane 200 % reduction in wait times** and cross functional losses **impacting revenue** growth and cost reduction goals with effective CRM implementation.

17) **Reduce Excessive errors within Major ERP** systems affecting the overall deliveries and penalty cost to 100 % accuracy.

18) **Accurately Map the process which reduced the overall cycle of** process **improvement by 50%**

19) **Reduced waiting time for new in** customer processing process by 10%

20) **Improved PR- PO process to reduce effort by using RPA 20 %**

21) Implement ChatGPT styled WhatsApp integrated chatbot with minimum adoption efforts to enhance customer communication response time to below **2 min from 24 hours.**

22) **Reduced Response Times**: Achievement: Implemented **RPA** bots to automate the retrieval and processing of customer information from various systems.

Result: Significantly reduced response times for customer inquiries by automating data retrieval, enabling customer service representatives to access relevant information promptly

23) **Increased Accuracy in Data Entry**: Achievement: Integrated **RPA** bots to handle routine and repetitive data entry tasks, such as updating customer records and processing transactions.
Result: Minimized manual errors in data entry, leading to improved data accuracy and a reduction in customer service issues related to incorrect information.

24) **24/7 Availability for Transaction Processing:**
Achievement: Implemented Robotic Process Automation to handle transactional processes and routine tasks beyond regular working hours.
Result: Provided customers with round-the-clock service, enhancing accessibility and responsiveness, especially for global or geographically dispersed customer bases.

25) Implement **ChatGPT styled WhatsApp** integrated chatbot with minimum adoption efforts to enhance customer communication response time to below **2 min from 24 hours.**
26) **Reduce Excessive errors within SEO , Ads** systems affecting the overall customer has received new product and service information with100 % accuracy.
27) **Accurately Map the process which reduced the overall cycle of** process **improvement in the new customer acquisition environment by 50%**
28) Reduced waiting time for new in customer processing process by 10%
29) **Improved PR- PO** process to reduce effort by 20 %
30) **Achieved High CTR,** lowest bounce rates and Website content visits.
31) **Increased Organic Traffic**: Successfully boosted website traffic through SEO and content marketing efforts.
32) **Enhanced Conversions**: Optimized landing pages and email campaigns for higher conversion rates and increased leads or sales.
33) **Social Media Growth**: Significantly expanded social media followers and engagement, elevating brand visibility.
34) **Cost-Effective Ads:** Managed ad campaigns to lower acquisition costs while maintaining or increasing conversions.
35) **Email Marketing Success**: Improved email open rates, click-through rates, and revenue from email campaigns.
36) **Improved Financial Reporting Timeliness:**
Achieved a 20% reduction in monthly financial reporting turnaround time within the Xero system, exceeding the key performance indicator (KPI) of a 15% improvement. Enhancements in data processing and streamlined reporting workflows contributed to more timely decision-making.
37) **Enhanced Xero User Proficiency:**
Surpassed the KPI of a 25% increase in Xero user proficiency by implementing targeted training programs. Resulted in a more skilled and confident finance team, leading to a smoother transition to advanced Xero features and improved overall operational efficiency.
38) **Operational Efficiency Enhancement:**

- *Achievement:* Implemented streamlined workflows and process improvements, resulting in a 15% increase in overall process efficiency.

- *Achieved a 20% reduction in average time to handle customer inquiries and escalations.*

39) Cost Savings Initiatives:

- Identified and executed cost-saving opportunities, leading to a 12% reduction in operational expenses
- Implemented 5 cost-saving initiatives resulting in substantial financial savings.
- Ensured a 15% improvement in cost-effectiveness in resource utilization.

40) Customer Satisfaction Improvement:

- Implemented customer-centric initiatives, resulting in a 25% improvement in customer satisfaction scores.
- Achieved a 30% reduction in the number of customer escalations.
- Received a 20% increase in positive customer feedback.

41) Crisis Management Preparedness:

- Developed and implemented comprehensive crisis management plans, resulting in a 30% reduction in downtime during crises.
- Successfully executed crisis management plans in 100% of unexpected events.
- Received positive feedback from stakeholders, indicating an 85% satisfaction rate with the effectiveness of crisis response

42) Resolution Time:

- Achieve a resolution time KPI of 24 hours for customer inquiries and issues, ensuring swift and effective problem resolution.

43) Cost Saving

Operational Cost Reduction:

- Achieve a 10% reduction in operational costs through continuous improvement initiatives and cost-saving strategies.

44) Profitability

Profit Margin Improvement:

- Increase profit margins by 5% through strategic pricing, cost management, and revenue generation initiatives.

Support Function

- Lead both non-tech savvy and technical team members to successfully deliver the project.
- Ability to analyze problems and provide quick solutions.
- Train projects teams for upcoming projects
- Strong inclination towards new technology
- Proven experience communicating effectively at all levels of business.
- Excellent written and spoken English.
- Strong influencing skills, with experience in cross functional teams
- Represent the respective department in cross functional situations.
- Develop and Implement cost savings plan.
- Strong Adherence to Quality Compliance, Workplace Safety
- Technology Savvy, Self-motivated and willingness to learn.
- Very high computer literacy and work ethics, flexible
- Self-starter and Ability to work without supervision.
- Establish Vendors to support business needs.

EDUCATION:

Advance Certification in Smartsheet **2020**
Smartsheet , USA

Certification in Business Foundation
Wharton Business School, USA 2016 ongoing

Coursework:
Marketing Management, Accounting, Corporate Finance, Operation Management

Certified Associate in Project Management 2012
Project Management Institute (**PMI**), PA, USA

Lean Six Sigma Black Belt 2011
American Society of Quality (ASQ), Milwaukee, USA

Six Sigma Green Belt 2010
American Society of Quality (ASQ), Milwaukee, USA

Certification Managing and leading change
(Practical & Real world) 2018
Udemy , USA

Certificate IV in Allied Health Assistance (Nutrition and Dietetics) and
Endeavour College of Nutritional Health Sydney, Australia Ongoing Feb 2026

Bachelor in Engineering
Uni of Raj 2007

Professional Summary [*Business and Operation Improvement]*

- Currently with **Procurement A** (Local Government) as a Customer Quality Change Specialist since May 2024

- I have worked with Fletchers Customer Quality Change Specialist since Sept 2022

- Worked with FSPR as a Customer Quality Change Advisor since June 2020

- **Worked** as **Business Improvement Projects Manager with NSW health (Sydney) with Statewide responsibility an** NSW health since March 2015 –March 2016

- Worked with VFX **Print** Group Sydney as **Manager** (**Business Improvement** /**Operations Excellence**, NSW, VIC, QLD) since **Nov 2016 –March and improved overall business profitability.**

- Worked with **UGL Unipart** as a **Manager in Business Growth and Improvement Strategy)** to improve speed, efficiency, quality, accuracy a **multi-million-dollar Business**

Operations and its reporting though improvements, change, project trials, coaching since Feb 2019.

- **Worked with Serco** (Sydney) as Projects, Business, Process **Improvement** Consulting. between **July 17 –Jan 2018 Project**

- **Worked** with **Serco** as Projects, Business, Process and Marketing **Improvement** Senior Consultant. **(Between Aug-Sept 2016)**

- Worked with **Justice NSW (**June 2018-Sept 2018**)** with Department of Justice NSW with **Policy, Strategy & performance** as **Business** Improvement Professional

- **Previously worked with Larsen &Toubro (L&T, USA**) -Technology-driven 14 billion USD company) –as Assistant Manager, **Marketing and Business Excellence, between August** 2007—Dec 2014

SOFTWARE SKILLS:

- **AI**
  Copilot, Chatgpt, N8N, Supabase, Lovable, Cursor, Power Automate, UI Path
- **ERP**
