Ashok Mulchandani | Specialist in Agentic AI, Business, Process Automation, Transformation, Process Quality Improvement and CRM/ERP CRM

ashokmul.chandani@gmail.com | +61 424 514 214 (Primary) | Sydney, NSW

Professional Summary

Highly innovative and results-driven **Process Design /Change/ Adoption, Agentic AI, Robotic Process Automation, Quality Improvement, transformation, excellence, CRM, ERP professional** with combined **18+ years of experience** at the intersection of **AI and Agentic Process Automation Cycles(Order-to-Cash), (Record-to-Report), (Procure-to-Pay),**Continuous Improvement product management and advanced AI engineering. Proven track record in defining and delivering transformative AI solutions, including **agentic multi-node decision models** and **CRM**, **RAG systems**. Adept at leveraging deep technical expertise to drive business strategy, manage complex projects, and champion ethical AI adoption in dynamic environments. Expert in PMI, Smartsheet, MS Viso Process mapping, Scrum , Kanban, Business Application, **Automations n8n, Power tools Automate, power Apps, UI Path**, Hubhello, LangChain, **Aircall, Salesforce, Hubspot MS Dynamics**, **AI Calling Automation, Azure Open AI, Azure Ai, AWS AI services**, Vector Databases, Open AI Embedding, and skilled in **full-stack AI Agentic application development**. Combines strong technical prowess , program delivery management , people change with a strategic mindset, demonstrating commercial acumen, effective stakeholder engagement, and a commitment to delivering high-impact, ethically sound AI solutions that revolutionize business operations for various sectors including **Insurance, Government Procurement, Warehousing, Logistics, 3PL,Manufacturing, Maintenance, assets, Functions like, Underwriting ,Tendering, Contracts, Training, Strategic Procurement Solutions, Business Development, People and Culture, Marketing and Events, IT Support, Finance, payroll Accounts (payable/receivable) PMO, Legal, and Supplier Relationship Management**

Key Expertise and Focus Area

- **Digital Transformation & Automation: AI Bot Agents** (ChatGPT 4.0, Google Gemini), RPA (UiPath, Automation Anywhere), CRM/ERP Implementation & Integration, Digital Dashboards (**Power BI,** Tableau, Qlik Sense), Workflow Automation.
- **Stakeholder & People Management**: Cross-functional Collaboration, Coaching & Mentoring, Lean Cultural Change, Organizational Change Management (OCM), Training & Development, Team Leadership.
- **Organizational Change Management: Utilized tailored** OCM strategies with various stakeholder groups, including team members, managers, and executives, to implement focused training and adoption workshops. This supported projected growth by ensuring effective change integration across all levels and departments, from operations and ICT to marketing and human capital.
- **Data Analysis & Business Intelligence**: Minitab, MATLAB, Excel Dashboard, SQL, Data Collection & Interpretation, Predictive Analytics, KPI Development & Monitoring, DOE, MSA.
- **Project & Program Management**: Project Scoping/Reporting, PMO Governance, CAPEX, RAID Logs, Agile Methodologies, Project Planning & Execution, Critical Path Management.
- **Quality Management Systems** (QMS): ISO 9001/13485, ISO 14971 Risk Management, Quality Audits (Internal/External), NCR Resolution, PFMEA, GAP Assessments.
- **Industry Compliance**: Build Solutions in line with policies and relevant regulatory requirements

(Australian Privacy Act, CDR, ASIC, APRA CPS 234, ISO 27001, **ISO 42001:2023 for AI**). For Personal Identity Data etc , Work with Risk and Compliance stakeholders to ensure AI-influenced decisions are appropriately logged and explainable.

- **Operational Excellence**: Lean Six Sigma (DMAIC, DFSS, ADKAR, PDCA, NPD), Value Stream Mapping, Process Re-Engineering, OEE Improvement, Audits, Statistical Process Control, TPM, SME
- **Process Impacts:**
    - Customer Support, Multichannel communications
    - Credit Claims Management, New Policy Issuance, AI-Audio Claims
    - Marketing and Sales, Business Development
    - Finance, Payroll, APAR
    - Procure-to-Pay
    - Legal, Contract Management, Supplier Management
    - Project Management, scoping, Data Collection and Analysis
    - Machine DOWNTIME reduction, Packaging operations,
    - Warehouse Operations,
    - Reverse Logistics', Inbound/Outbound, Post goods issue, Gate pass
    - Project Management, Scoping
    - Reporting Process,
    - Workplace health & Safety Process
    - Freight Forwarding,
    - Finance Accounts Payable/Receivable,
    - Reporting Process,
    - Demand Planning, Forecasting, Predictions,
    - Machine and Packaging automation
    - Multisite integration
    - Manufacturing Process, Packaging lines, Material Supply, logistics, Quality Assurance, Regulatory Check, Dispatch, inbound/outbound
    - People Change Management
- **KPI Impacts:**
    - Underwriters , Policy Makers, Payroll, PA, APAR Accuracy, Cash Flow, Marketing, Sales BDM, Digital Marketing, HR/HCM, PMO, Supplier Performance, Procurement, Supply Chian , Warehousing, ISO 9001 Compliance, OEE, Lead time, DOWNTIME reduction, NVA reduction, Cycle Time, DIFOT, Freight Cost, Operations team Utilization, Kitting Accuracy, Obsolescence Process, Dispatch Process, Packaging Process, Warehousing (Inbound /outbound KPI's), Accuracy of Order Processing within customer contact centers, labor and storage cost, turnaround time of Asset Maintenance Delivery, Operation Team Utilization, Reporting Accuracy

- **Stakeholder Impacts:**
    - Engage with a wide variety of audiences who are beneficiaries of the newly established documentation, processes, systems, location in a variety of Maintenance sites across the water borders of Australia. for instance, Team members, team leaders, Operation Manager, General Managers, Safety managers, Analysts, Production, Logistics Staff, Asset Engineers, Quality Assurance, Regulatory/Compliance, ICT staff Members, Supply Staff Members, Filed Technicians, Project Managers, Program Managers, Marketing, and HCM (Human Capital Staff), Contact Centers, CIO, CTO, CFO, CEO

AI Product & Strategy:

- AI Product Management & Roadmap Definition
- Project Management (Timelines, Budgets, Risk Management)
- Product Performance Measurement & Reporting
- Ethical AI, Data Governance, Change Management
- Data & Analytics Ecosystems (AWS, Azure, Snowflake, Databricks)
- Tools: Jira, Confluence, Figma, Power BI, Tableau

Consultative & Soft Skills:

- Consultative Mindset & Strategic Thinking
- Commercial Acumen & Problem-Solving
- Strong Communication (Technical & Non-Technical Audiences)
- Stakeholder Engagement & Influence
- Entrepreneurial & Adaptable Mindset
- Analytical Thinking

Strategic Design & Operating Models

- **Future-State Architecture**: Spearheaded the design of comprehensive Operating Models and OCM strategies, aligning technical Agentic AI roadmaps with overarching business goals.
- **Capability Diagnostic** Reviews: Conducted thorough change impact assessments and diagnostic reviews across cross-functional teams (Production, Logistics, ICT) to identify disruptions and maximize adoption.
- **Transformation Roadmaps:** Developed structured implementation plans and transformation roadmaps that integrated benefits realization principles to measure tangible ROI.

Stakeholder Engagement & Leadership Alignment

- **Executive Facilitation**: Led Leadership Alignment Workshops for Board Members, C-suite stakeholders, utilizing design thinking to foster a unified approach to large-scale change.
- **Compelling Insights**: Produced high-quality consulting deliverables, including advanced data analytics and visual management dashboards, to inform strategic decision-making.
- **Collaborative OCM:** Managed resistance through proactive stakeholder engagement, applying ADKAR/Prosci principles to ensure long-term cultural and behavioral shifts.

Digital & AI Transformation Delivery

- **Agentic AI Engineering: Designed** and deployed autonomous AI workflows and multi-node decision models using LangGraph and AWS Bedrock to solve complex operational bottlenecks.
- **RAG & Semantic Search**: Architected Retrieval-Augmented Generation (RAG) systems and Vector Databases (Pinecone, Weaviate) to transform unstructured data into actionable business intelligence.
- **Technology Adoption**: Collaborated with ICT teams to develop seamless adoption strategies for new

technologies, ensuring employees were trained to maximize system benefits.

CRM/ERP Expertise:

- CRM/ERP CRM Architecture & Design
- Marketing Hub, Sales Hub, Service Hub
- CRM/ERP CMS (Templates, Landing Pages, Content Modules)
- Workflows, Pipelines, Automation (Marketing, Sales, Customer Success)
- Custom Objects, Custom Properties, Deal Stages
- Lead Nurturing, Lead Scoring Models, Segmentation Strategies
- Email Templates, Forms, User Permissions
- Dashboards, Reports, Performance Metrics Analysis

Customer Lifecycle Management RPA, Bot , Process automation, Agentic AI & Engineering:

- Agentic AI Construction (Multi-Node Decision Models, MCP,State Graphs, Agentic Memory, API Integration)
- Retrieval Augmented Generation (RAG) & Semantic Search
- LLMs (OpenAI, Anthropic, Gemini, Hugging Face, **AWS Bedrock models**).
- **Azure OpenAI Service,** Azure AI Vision, Azure Content Safety, and Azure Document Intelligence. Professional experience with Azure AI Search (Vector/Hybrid Search) and LangChain integration for enterprise-grade generative AI apps
- Proficient in deploying and scaling LLMs via Azure OpenAI Service. Skilled in implementing Retrieval-Augmented Generation (RAG) using Azure AI Search and integrating enterprise data via Azure Data Factory and Blob Storage for high-concurrency AI agents and Simialry for AWS ECR, S3 Lambda
- RAG (Retrieval-Augmented Generation), vector databases (Pinecone, FAISS, Weaviate, Amazon Kendra).
- Building autonomous AI workflows, multi-agent systems, or orchestration layers.
- Data Scraping/Extraction & Unstructured to Structured Data Conversion
- Guardrails, Human-in-the-Loop, Multi-Agent Workflows, Reflection, Citing Sources
- Lang Chain/LangGraph/LangSmith, OpenAI API (Craw4Ai, WebUI, Swarm/Agents_SDK), AWS Lambda/S3/Gateway/ECR, AWS Cloud (Bedrock, SageMaker, Lambda, API Gateway, Step Functions, ECS/EKS).
- Vector Databases (e.g., Supabase, Pinecone, Weaviate), Fine-tuning, Docker, Kubernetes
- AI-Centric Coding Workflow (LLM-assisted development: Lovable, Firebase studio , Cursor AI, Copilot)
- Full-Stack Development (for AI PoCs), DevOps Methodologies, Github Actions

Primary Function 1 [End-to-end Service Change Management Delivery]

- **Developed and Executed Collaborative OCM Strategy: Spearheaded** the design and execution of a comprehensive Organizational Change Management (OCM) strategy, aligning it with business goals. Collaborated closely with leadership, stakeholders, and diverse teams, including team members, leaders, and department heads, to ensure a unified approach. Integrated benefits realization principles to measure the actual value gained from the implemented changes.
- **Engaged Stakeholders through Collaboration:** Fostered effective communication and collaboration by actively engaging with team members, leaders, and key stakeholders across departments. Utilized design thinking to facilitate collaborative sessions that gathered insights into their needs, concerns, and expectations. Ensured a holistic approach to change management by maintaining open lines of communication and collaboration.
- **Designed and Delivered Collaborative Training Programs: L**ed the design and delivery of targeted training programs tailored to the specific needs of different stakeholder groups. Collaborated with leaders, managers, and various staff categories to develop training matrices that tracked individual and team progress. Emphasized benefits realization through effective people training and onboarding, promoting a collaborative learning environment.
- **Conducted Collaborative Change Impact Assessment**: Conducted thorough change impact assessments in collaboration with cross-functional teams to identify potential disruptions and challenges across different departments. Integrated feasibility trials and collaborated with stakeholders to assess the practicality of proposed changes. Designed collaborative training programs to address knowledge gaps and maximize adoption, focusing on benefits realization.
- **Crafted and Executed Collaborative Communication Planning**: Crafted and executed communication plans collaboratively, conveying the purpose, benefits, and progress of organizational changes. Utilized design thinking principles in collaboration with diverse stakeholder groups to ensure clarity and engagement in communication materials. Incorporated benefits realization metrics collaboratively to measure the effectiveness of communication efforts.
- **Managed Resistance through Collaborative Approaches**: Proactively identified and addressed resistance to change collaboratively among various stakeholders. Utilized effective collaboration strategies to overcome objections and foster a positive mindset. Worked closely with leaders and teams to implement collaborative solutions for resistance management, emphasizing benefits realization and successful adoption.
- **Utilized Data for Collaborative Decision Making**: Collaboratively utilized data and analytics to assess the impact of change initiatives on productivity, employee satisfaction, and key performance indicators. Applied design thinking principles in collaboration with cross-functional teams to analyze data and make informed decisions. Incorporated benefits realization metrics collaboratively to evaluate the actual value achieved.
- **Facilitated Cross-functional Collaboration: Facilitated** collaboration and coordination among diverse departments, such as Production, Logistics, Quality Assurance, and ICT. Ensured that change initiatives were seamlessly integrated into daily operations and aligned with each department's unique requirements. Emphasized benefits realization through cross-functional collaboration, fostering a collaborative culture across the organization.
- **Established Feedback Collection and Analysis Mechanisms Collaboratively**: Established mechanisms for gathering feedback collaboratively from stakeholders at various levels. Applied design thinking collaboratively to analyze feedback and identify trends, concerns, and areas for improvement. Utilized benefits realization metrics collaboratively to assess the impact of feedback on the success of change initiatives.
- **Drove Collaborative Continuous Improvement Initiatives**: Drove a culture of continuous improvement collaboratively by identifying opportunities to enhance the OCM process. Collaborated with stakeholders to implement lessons learned from previous change initiatives and applied design thinking collaboratively to iterate on strategies. Emphasized benefits realization through ongoing collaborative improvements in the change management process.

- **Led Collaborative Leadership Alignment Workshops**: Conducted workshops and sessions to align leadership teams collaboratively, including CIO, CTO, CFO, and CEO, with the overarching change objectives. Facilitated discussions collaboratively to ensure top-level support, commitment, and active involvement in driving successful organizational change. Integrated benefits realization principles into collaborative leadership alignment strategies.
- **Developed and Implemented Collaborative** Crisis Communication Planning: Developed and implemented crisis communication plans collaboratively to address unexpected challenges or resistance that may have arisen during the change process. Anticipated potential roadblocks collaboratively and equipped leadership with strategies to navigate and mitigate crises effectively. Incorporated design thinking collaboratively to create agile crisis communication plans focusing on benefits realization.
- **Collaborated on Technology Adoption Strategies**: Collaborated with ICT staff to develop strategies collaboratively for the seamless adoption of new technologies. Ensured that technological changes were integrated smoothly, and employees were adequately trained to leverage and maximize the benefits of new systems. Integrated benefits realization metrics collaboratively to assess the impact of technology adoption on organizational goals.
- **Defined Metrics and KPIs Collaboratively**: Defined and established metrics and KPIs collaboratively to measure the success of change initiatives. Collaborated with different departments to develop performance indicators that aligned with organizational goals and provided a clear understanding of the impact of change. Incorporated benefits realization metrics collaboratively to assess the actual value achieved from implemented changes.
- **Implemented Employee Well-being Initiatives Collaboratively**: Implemented initiatives focused on employee well-being during times of change. Collaboratively developed programs to support mental health, provided resources for coping with stress, and created a positive work environment collaboratively that encouraged resilience and adaptation to change. Applied design thinking collaboratively into employee well-being initiatives, emphasizing benefits realization through improved morale and productivity.
- **Managed Documentation Processes Collaboratively**: Leveraged knowledge collaboratively to establish and manage comprehensive documentation processes for major projects. Conducted stakeholder analyses, change impact analyses, and business readiness planning collaboratively. Integrated benefits realization principles collaboratively into documentation processes to measure the tangible outcomes of the implemented changes.
- **Led Collaborative Facilitation and Collaboration Sessions**: Demonstrated excellent communication skills by leading collaboration sessions and workshops. Facilitated discussions collaboratively among diverse stakeholder groups to gather insights, address concerns, and foster a collaborative atmosphere conducive to successful change management. Incorporated design thinking collaboratively to enhance collaboration sessions and emphasize benefits realization.
- **Developed Collaborative Communication Materials**: Showcased strong communication skills by creating compelling and effective communication materials collaboratively. Developed clear and concise content for presentations, business documents, and other collateral collaboratively that conveyed the purpose, benefits, and progress of organizational changes to various stakeholders. Applied design thinking principles collaboratively to create engaging communication materials, emphasizing benefits realization.
- **Created Collaborative Business Documents**: Applied communication expertise to produce well-crafted business documents collaboratively. Drafted reports, plans, and other essential documents collaboratively that articulated key information related to change initiatives, ensuring clarity and alignment with organizational goals. Integrated design thinking collaboratively to enhance the usability and effectiveness of business documents, focusing on benefits realization.
- **Delivered Actionable Communication Collaboratively**: Utilized effective communication skills collaboratively to deliver actionable information to diverse audiences. Presented complex concepts in a clear and understandable manner during workshops and sessions collaboratively, ensuring that stakeholders were well-informed and engaged in the change process. Applied design thinking collaboratively to enhance the delivery of actionable communication, emphasizing benefits realization.
- **Applied ADKAR Prosci Change Management Collaboratively**: Incorporated ADKAR Prosci Change Management principles collaboratively into change initiatives. Utilized the ADKAR model collaboratively to assess and address individual change readiness, fostering a systematic approach collaboratively to ensure successful adoption and

implementation of organizational changes. Emphasized benefits realization collaboratively through the application of ADKAR principles.

Primary Function 2 [Process, Service Improvement Planning and Program delivery]

- **Gain Insights and Contribute** towards defining current state issues & future state KPI requirements for Successful delivering Transformations focusing future state KPI requirements for Successful delivering of the improvement outcomes **best operations delivery and end customer experience** focused on accurate data driven approach
- **Strategizing, Designing, Planning, Resourcing,** and managing the organizations Business Improvement pipeline, technology roadmap and digital strategy including the planning, prioritization, **and delivery methodology.**
- **Accountability for delivering the** expected value from enterprise-wide business change and transformation whilst directly supporting line management **and operational teams.**
- **Deploy Improvement Strategies** / Methodologies, **Root Causes Analysis** techniques to identify systems creating **risks** to **Transformation program** contractual commitments.
- **Develop key Analysis, Strategic Advisory** and lead the effort for organization to translates its corporate strategy and goals into actions, lead transformation changes programs, leveraging **technology** project delivery (ERP, **CRM**, Safety Systems, Financial, PMO, Value , Benefits, Integrated Reporting) and innovation to reduce complexity. and **manual** processes to impact **turnaround times** & **accuracy** (first time right) of service deliveries to the end **customers of the service in community** along with organization wide People change management
- **Implement efficient project management reporting by configuring cost and schedule variance reports.** Enhance the PM reporting dashboard with streamlined Setup Cost and Schedule variance insights, facilitating **quicker and more comprehensive project health assessments.**
- **Develop strategies in** Supporting the Executive Leadership Team (ELT) in embedding the requirement for continuous improvement and transformation into every team's KPIs.
- **Reduce inefficiencies** in the Projects delivery & process using **PDCA**, Value Stream Analysis and VA/NVA segregation, Method Study
- **Deliver Process, Systems. People Multi system Integrated reporting requirements** for maximum visibility reviews and establish key requirements in li**ne with transformations and strategic objectives.**
- **Develop & Lead Project Delivery Ecosystem** by setting up cross functional collaboration or teams (**organization structures**) by patterning Corporate Leadership, SME, Analytics, Operations, Change group, Business Operations, IT/ICT, Training, Suppliers Customers, Subcontractors, Supply Chain, Logistics, partners etc.
- **Setup/ Improve PMO Governance,** Reporting, Visibility, Collaboration and eliminate all the operational risks involved in accurately delivery on Contractual KPI's **(**Project Planning, Project Execution Management, Reporting, Project **Risk** Management, Project **RAID** Logs (risks, actions, issues, and decisions**)** , Workplace Safety Supply Chain, Material Accuracy, Project Management, Document Version Control), Accounts, Payroll, using modern **integrated digital** tools maximize **technological and corporate investment via effective GRC framework (Governance m Risks and Compliance)**
- **Deliver Accurate, precise and repeatable, reproducible Integrated reporting framework** for PMO planning, financial performance and operationalized KPI's and **value realization through service delivery and cost savings linked to strategic expectations**
- **Develop best in class** approach to track your **project budgets, Variations, quotes, cashflow** tasks, resource management through Red-**Amber**-**Green** Dashboards and **Critical path** dashboards, Reduce Project (Residential, Commercial, Civil) Cost Over Run resulting from **Variations**
- **Develop Documentation management** system to oversee timely, accurate and version-controlled documentations is releases in line to reporting framework with maximum **GRC (Governance, Risk and Compliance)**
- **Develop proactive culture** via **MS teams** auto-**notifications**, **integrated** reporting, collaboration, productivity, and efficiency in organization through broad range of tailored-to-your-project-management-needs digital solutions to achieve best utilization of the project teams.
- **Centrally** manage via modern digital tools all the safety procedures/ surveys, insurance certificates, licenses, plans, manuals, 3D-models, drawings, approvals, condition reports, project variation, invoice, quotes with latest version control with minimal admin support.

- **Setup** visibility in the organization through **HSEQ** instilling **LTI, LTIIR, LTIFR, NLT, FAC Reporting** Dashboard, **Environmental** policy and tailored-to-fit project management, workflows to timely **resolution and prevention, safe COVID-19 check in and check out, site sub-contractor management solutions, Map CYBER and physical Security threats against business continuity plans**
- **Setup Digital Process** for accurately and on time **reporting** and remediation of workplace health and safety, program and portfolio management **integrating SAP, Salesforce, HubSpot, Primavera, Smartsheet, Qlik, PowerBi, Tableau**, focusing delivering **projects** such that **Service commitments**, Project Scope, Budget, and timelines are met with full **visibility** of Project Execution
- **Develop Key Change Management plan** for close operation handover of the reporting methods developed and with effective change adoption across **stakeholders' groups with, Project Management, Project Execution, field services, field installation, Warehouse, Admin, Procurement, Logistics, Covid workplace safety**
- **Implement and gain higher utilization** of modern business ICT Reporting tools and productivity tools such that operational efficiency targets are met
- Define clear and efficient **reporting** requirements for effective KPI like, **Delivery Accuracy, Project budgets,**
- Develop and define the project visibility using **Lean visual management tools** (**Red**, **Amber**, **Green**) Category to avoid mix up of New and used components and time losses, double handling
- **Analyze, Plan, Strategize and Project Manage**, deliver the overall direction of the delivery Goal/ outcome, and bring a large cross functional stakeholder onboard and come up with a joint vision for improvement via a consultative and collaborative workshop.
- Championed trials / implementation for large scale improvement project using **Tailored fit-for-purpose Lean Six Sigma** business tools with and achieved high level of engagement & acceptance from the staff members from bottom – top levels and achieved sustainable, repeatable, and reproducible practices using (**SOPs with clear responsibility, accountability**) and successful results helped others continue the ongoing journey of improvements.
- Develop and utilize the cutting-edge digital tools to help boost the productivity like **CRM, workflow integrations, CoBot, Spend Management**
- **Thorough implementation and reporting via** modern & live Dashboards for highest accuracy when it comes to follow up actions **in a constructive and consultative manner**
- Identifying, scoping, and assessing opportunities for **improvement** in the **Current state** (As-Is maps) and develop **Simplified Future State** models (To-be Maps) with **quicker turnarounds,** higher quality, low risk business systems.
- **Project Managed** right from inception through to delivery with several planned **SMART** initiatives with **accurate Business Case** and with **highest possible change** adoption within schedule and budget with efficient project management practices and collaboration
- Facilitate cross function, many varied stakeholders' wide **workshops** focussed on **human cantered design, using design thinking** to build consensus on new strategy, digital solution for organisation wide acceptance and success with repeatable positive outcomes for customers for permanent revenue growth and profit margins
- Develop and implement, **business case, roadmap-, capability assessments, approvals, address** requests for commercial quotes and financials in regard to evaluating ICT software packages, stakeholders' engagement / approvals, develop use cases and managing their deployment in the journey of business transformation through digitalization and API Integrations
- **Deliver in Collaboration with IT/ICT teams to ERP Improvements** / **integrations** to facilitate high accuracy of transactions and eliminate process delays, excessive steps, over processing, training issues, quicken the service delivery / address within-the-stages-of-process-functions-communication issues
- Deploy highly effective, practical, and tailored-to-fit **OCM** (Organizational Change Management) process with various stakeholder's groups like, **Team members, team leaders, Operation Manager, General Managers, Safety managers, Analysts, Production, Logistics Staff, Asset Engineers, Quality Assurance, Regulatory , ICT staff Members, Supply Staff Members, Filed Technicians, Project Managers, Program Managers, Marketing and HCM (Human Capital Staff), Contact Centers, CIO, CTO, CFO, CEO**
- **Successful Technological Delivery on Seamless integration with your existing Productivity Tools** like Procore, iSafetyFirst, lucidity software (**HSEQ/WHS/Safe**ty) **Monday Dot com**, **Smartsheet**, Office 365, OneDrive/Dropbox/Google Drive, MS Project, JIRA, **ServiceNow**, and **ERP/CRM** systems like SAP, Blue yonder,

Manhattan, Oracle JD Edwards, **CRM Salesforce, HubSpot**. **Payments** (PayPal/Stripe) **Accounting** (Xero/MYOB/QuickBooks), Payroll and **Hiring** (Workday/Zoho/Sage/Key Pay), **SharePoint**, **Financial** Dashboards through (**PowerBi/QlikView/Tableau**) and more for Live & **maximum visibility and reporting**

Employment History & Accomplishments

CI Process Automations Specialist (Customer Experience, Continuous Quality Improvement, Operations Excellence, Innovation) | Government Procurement Department (May 2024 - Present)

- **Developed and implemented** an Agentic RAG calling bot for initial customer support inquiries, achieving a 15% increase in first-call resolution rates and reducing average call handling time by 2 minutes within 6 months, significantly improving customer satisfaction scores.
- Led the first-ever **ISO 9001:2015 Ac**creditation from scratch, developing and maintaining the Quality Management System across 14 functional units. Along with **Agentic AI based Data knowledge base**
- Implemented an Agentic AI Chatbot (**ChatGPT 4.0, Google Gemini, perplexity, CRM/ERP, Aircall**) as a 24x7 ISO 9001:2015 guidance portal, enhancing operational readiness.
- **Designed and implemented scalable CRM/ERP** architectures, ensuring best practices for data flow, system integration, and module management across diverse business units.
- **Acted as a strategic partner** to Revenue Operations, Sales, and Marketing leadership, proactively identifying and implementing system improvements that consistently aligned with core business goals and enhanced ROI.
- **Deployed an Agentic RAG bot for automated contract review**, successfully extracting 99% of key clauses and legal entities from 1000 Tendering Contractual Documents/ month of legal documents, leading to a 70% reduction in manual review hours and mitigating compliance risks over 9 months.
- **Automated website crawling** and knowledge base population for various Industrial sector customers using an Agentic RAG bot, reducing manual data collection time by 60% and ensuring 98% data freshness for critical business insights and improving NPS scores
- **Achievement: Developed and implemented an Agentic RAG bot for invoice duplication detection** and control, preventing **over $150,000/monthly** in duplicate payments and reducing manual reconciliation effort by **45%** for the Accounts Payable department
- **Achievement: Led the design and deployment of an Agentic RAG solution** that cross-referenced incoming invoices with historical payment data and vendor contracts, improving duplicate invoice detection accuracy to **99.5%** and decreasing invoice processing exceptions by **30%** within **4 months**
- **Achievement: Developed an Agentic RAG bot** to analyse project documentation ([e.g., meeting minutes, risk registers, progress reports]) across **15+ active projects**, proactively identifying of potential risks and bottlenecks each week, which facilitated early intervention and resulted in a **15% reduction in critical project delays** over the last **fiscal year**.
- **Achievement: Designed and implemented an Agentic RAG system** that ingests raw analytical data from dashboards, databases and generates natural language explanations and actionable insights for non-technical users, increasing data literacy by **20%** and accelerating decision-making by **one business day** across
- **Engineered an Agentic RAG bot for automated lead nurturing** that responded to prospect inquiries with personalized, context-aware information, leading to a **20% improvement in lead-to-opportunity conversion rate** and freeing up sales reps' time by **10 hours/week**
- **Architected and delivered a Multi-Turn Agentic AI Assistant using** n8n, Azure OpenAI GPT-4o and Azure AI Search, enabling underwriters to query complex **Procurement** applications via natural language and reducing manual document review time by an estimated 40%
- **Implemented a hybrid RAG pipeline** (vector + semantic search) with section-aware chunking across Azure AI Search, achieving accurate retrieval of applicant medical history, lifestyle disclosures and financial details from unstructured PDF applications
- **Built a multi-agent orchestration pattern** with 3 specialist sub-agents (Document Search, Underwriting Analysis, Summary Generator) coordinated by a central conversational agent, reducing underwriter time-to-insight from hours

to under 60 seconds per application

- **Designed and deployed an LLM-as-Judge validation framework** with 3 parallel judges (Factuality, Completeness, Consistency) using weighted scoring (40/30/30) to ensure AI-generated underwriting assessments meet quality thresholds before delivery
- **Implemented a APRA-compliant audit trail with 7-year retention**, **PII/PHI access** flagging and structured JSON logging to Azure Blob Storage, ensuring full traceability of all AI decisions for regulatory compliance
- **Developed an automated error handling** and alerting system using n8n error workflows and Telegram bot integration, categorising errors by severity (CRITICAL/WARNING/ERROR) and delivering real-time alerts, reducing mean time to detection for system failures
- **Built an MCP (Model Context Protocol) server exposing** 5 underwriting tools as standardised API endpoints, enabling external AI clients to interact with the underwriting system programmatically
- **Delivered an automated Word document generator** that converts AI-generated underwriting summaries into structured reports saved to Azure Blob Storage, covering 17 application sections including medical history, lifestyle risk and red flag identification

Process Automations CI Manager (AI Agents Improvement) | FSPR (Future State Partners) (July 2020 - May 2024)

- **Automated website crawling** and knowledge base population for various Industrial sector customers using an Agentic RAG bot, reducing manual data collection time by 60% and ensuring 98% data freshness for critical business insights
- **Led the development and optimization of CRM/ERP CMS templates**, landing pages, and content modules, contributing to a tightly integrated growth engine that significantly drove acquisition and conversion rates.
- **Optimized complex CRM/ERP workflows**, sales pipelines, and marketing automation sequences, resulting in streamlined go-to-market processes across Marketing, Sales, and Customer Success teams.
- **Developed and maintained robust custom integrations** between CRM/ERP and critical external platforms (e.g., Braze, Zapier, internal tools), ensuring seamless data exchange, high reliability, and scalable system performance.
- **Designed and deployed an Agentic RAG web crawler** to extract and structure product specifications from 200+ manufacturer websites, resulting in a 40% increase in product data accuracy and accelerated new product onboarding by 2 weeks within the first quarter of deployment
- **Developed and implemented** an Agentic RAG calling bot for initial customer support inquiries, achieving a 15% increase in first-call resolution rates and reducing average call handling time by 2 minutes within 6 months, significantly improving customer satisfaction scores.
- **Engineered an Agentic RAG sales qualification** bot that autonomously conducted initial prospect outreach and qualification calls, resulting in a 20% increase in qualified leads passed to sales representatives and a 10% reduction in sales cycle length over a one-year period.
- **Deployed an Agentic RAG bot for automated contract review**, successfully extracting 99% of key clauses and legal entities from 1000 Tendering Contractual Documents/ month of legal documents, leading to a 70% reduction in manual review hours and mitigating compliance risks over 9 months.
- **Designed and implemented an Agentic RAG system for research paper analysis**, autonomously extracting key findings, methodologies, and author affiliations from 500+ scientific articles weekly, thereby accelerating literature review processes by 50%
- **Implemented an Agentic RAG aong with Prompt Engineering content generation bot** that dynamically creates personalized marketing copy for customer segments, resulting in a **12% increase in click-through rates (CTRs)** on digital campaigns and a **5% boost in conversion rates** within **6 months**.
- **Achievement: Designed and deployed an Agentic RAG system** that dynamically generates tailored sales proposals and quotes based on customer needs and product configurations, reducing proposal creation time by **35%** and increasing proposal accuracy by **95%**, contributing to a **5% higher win rate**
- Reduced penalty costs and improved material supply accuracy from 59% to 100% in PMO functions through automation and Visual Management tools.
- Implemented ChatGPT-styled WhatsApp integrated chatbot, reducing customer response time from 24

hours to under 2 minutes.
- Reduced average handling time (AHT) for customer support requests by 20% using Lean Six Sigma.
- Led successful rollout of new digital support channels, increasing customer interactions by 15% in Q1.
- Reduced financial reporting turnaround time within Xero by 20% via streamlined workflows.
- Implemented RPA bots to automate customer information retrieval and PR-PO process, reducing effort by 20%.
- Managed organizational change for major technology rollouts (SAP, Oracle, Smartsheet, Salesforce, **CRM/ERP, SAP, Hubspot, Zoho, Primavera**), driving cost reduction and sustained value.
- Improved demand forecasting accuracy by 20% and reduced customer service inquiries related to booking discrepancies by 25% through advanced analytics.
- Achieved 15% increase in overall process efficiency and 20% reduction in customer inquiry handling time.
- Identified and executed cost-saving initiatives, leading to a 12% reduction in operational expenses.

Continuous Improvement Execution Specialist | **Stramit - Fletchers (Aug 2022 - March 2023) (Consulting Assignment)**

- Achieved ISO 9001:2015 re-certification with NIL Non-conformance by establishing comprehensive QMS and audit plans.
- Delivered measurable reduction in material waste and warranty claims, contributing to a $1 million national saving target.
- Successfully implemented the "10 Pillars Operational Excellence program" across the region.
- Drove OEE excellence, projected to deliver $300k in savings per region in year one.
- Increased productivity in flashings and rainwater cells by 40% in Metro sites, achieving 90 pieces per person per hour.

Specialist in Business Improvement & Coach (Tech Mgr.) | **UGL Unipart -(Feb 2019 - July 2020)**

- Improved business delivery accuracy (DIFOT) from 85% to 100% across multi-functional and multi-site scope using Lean, data-driven, and change management principles.
- Project-managed various SMART initiatives from inception to delivery, ensuring high change adoption within schedule and budget.
- Coached a large pool of staff on Lean tools and business improvement methods, enabling independent improvements.
- Designed and established effective communication cells and visual management systems for team collaboration and process monitoring.

Business Improvement Professional | Department of Justice (June 2018 - Sept 2018)

- Captured As-Is and designed To-Be processes for a major strategic project in corrective services, improving prison population flow, and creating capacity.
- Finalized analysis and direction for a statewide project to maximize prison bed availability, establishing a baseline for business improvement.
- Helped establish a reporting and analysis mechanism across statewide operations (System/People/Process) to develop a collaborative reporting capability.

Projects, Business, Process Improvement Consulting | Serco – Defense and **Royal Navy (RAN)** (July 2017 – Jan 2018)

- Led a major change and business improvement project to evaluate and implement a data centralization IT solution (O365 and MS SharePoint) for Naval Ships and Asset Management.
- Improved productivity by minimizing effort waste and enhancing information sharing and collaboration

within defense contract execution.
- Ensured cost-effective compliance with Defense contractual obligations with higher data accuracy.
- Developed work instructions and documentation for the FMSC Maintenance Planning function.

National Manager (Operations and Excellence) | VFX Print Group (Nov 2016 – March 2017)

- Improved productivity by 10-15% through reduction in downtime and improved manpower utilization, saving $100,000.
- Reduced rework from 25% to NIL by improving delivery processes, achieving record delivery levels and turnaround times.
- Implemented a bespoke Planning Mechanism using existing IT infrastructure, saving costs on new systems and optimizing resource utilization.
- Overcame resistance to change by exploiting Change Management methods, improving product distribution time by 30%.

Senior Consultant Projects, Business, Process Improvement | Serco Defense (Royal Navy) (Aug 2016 – Sept 2016)

- Established a new, improved Digitally Automated Transactional Process for Maintenance Management System – "Digital Sustainability" for Armadale Class Patrol Boats (ACPB).
- Designed a new process to utilize Siemens' PLM solution (worth $3 million AUD), optimizing headcount.
- Developed optimized digital business processes for marine vessel assets maintenance management.

Continuous Improvement Specialist (Projects) | Department of Health (March 2015 – March 2016)

- Successfully delivered Pilot Reduction in Hospital Meal Wastes across five Major State-Run Hospitals, with projected annual cost savings of $3 million statewide.
- Reduced errors and simplified Payroll-Overpayment Process, saving $1 million with 5% error reduction and headcount reduction.
- Optimized Supervisor's Workload across all Local Health Districts (LHDs) by task centralization.
- Led Lean deployment across Linen sites to reduce waste, aiming for $10 million in savings.

Assistant Manager | Larsen & Toubro Ltd. (North America, Mexico, China, Taiwan, India) (Aug 2007 – Dec 2014)

- **Operational Excellence Consulting (Client: CISCO, China):** Consulted to reduce product transformation/conversion cost for a major consumer electronics manufacturer.
- **Operational Excellence Specialist (Clients: Covidien, STERIS, USA):**
  - Championed the implementation of the Unique Device Identification FDA Protocol (UDI) to enhance traceability.
  - Automated manual wax stamping process, eliminating 24 man-hours per shift (IQ/OQ/PQ performed).
  - Reduced in-process inventory waste/rejection from 7.6% to 1.5% through control plan implementation.
  - Improved productivity of Endoscopic Surgery Staple Instruments Product Line #2 from 200 to 1000 per shift using Lean-VSM, generating $115 million USD/year.
  - Led KAIZEN for Change Over Time Reduction at Endoscopic Surgery Staple Instruments Product Line 1&2 from 45 min to 15 min, saving $2 million USD/year.
  - Salvaged QC-fired SULU (Single Use Loading Units), saving $350,000 USD/year.
  - Improved productivity of Vloc TM Wound closure devices, saving $31 million USD in initial investment.
  - Reduced field failure complaints by 80% through in-depth study of medical device assembly process.

Operational Improvement and Excellence specialist (Clients: Rockwell, P&G, Oshkosh, DAF, Paccar Trucks):

- Reduced changeover time by 67% on the FMCG packaging line, generating $7 million USD/year for P&G.
- Managed LVMCC 2500 Mechanical engineering deliverables, generating $1.8 million for Rockwell Automation by reducing customer response time.
- Reduced defects in Final Quality Check for the Assembly drawing creation process, saving $50,000 USD/year.
- Performed Time and Motion Study for AGCO Inc., achieving Zero Production.

Education & Certifications

- **Certification in Business Foundation** | Wharton Business School, USA (2015 - ongoing)
- **B.S. Engineering** | University of Raj, India (July 2003 - July 2007)
- **M.S. (By Research) Industrial Engineering: Concentration Management Systems Engineering** | Indian Institute of Technology Madras (**IIT**), India (Jan 2014) (Thesis WIP)
- **Certified associate in project management** | Project Management Institute (PMI), USA (2012)
- **Lean Six Sigma Black Belt** | American Society of Quality (ASQ), USA (2011)
- **Six Sigma Green Belt** | American Society of Quality (ASQ), USA (2010)
- **Certified Manager Organizational Excellence** | ASQ (Expected 2027)
- **Certification Managing and Leading Change** | Udemy, USA (2018)
- **Certification in AWS Certified AI Practitioner** | AWS (Expected in 2026)
- **Certification in AWS Certified Machine Learning Practitioner** | AWS (Expected in 2026)
- **Certified in HCD (Human Centred Design) IIT Bombay 2006**

Software & Tool Proficiency

- **AI/Automation:** AI Copilot, ChatGPT 4.0, N8N, Supabase, Power Automate, UI Path, Automation Anywhere.
- **ERP/CRM:** Machsip, Oracle, SAP, JDE, Blue Yonder, BPCS, CRM/ERP, Zoho, Salesforce, ProWorkflow, Pipedrive, MS Dynamics.
- **Project Management:** Principal Toolbox, Trello, Basecamp, MS Project 2016, Smartsheet, Primavera, Monday, PROCORE, JIRA, ServiceNow.
- **Process Management & Mapping:** MS Visio, Holocentric, Draw.io, Lucidchart, Signavio, ARIS, Promapp, Celonis.
- **Analysis & Business Intelligence:** Minitab 15/16/17, MATLAB, Power BI, Tableau, Qlik Sense, QlikView, Excel Dashboard, PYTHON.
- **Accounts & Finance:** SAP, XERO, MYOB, Oracle, QuickBooks, PayPal, Stripe.
- **CAD/PLM/Simulation:** PRO/E Wildfire 3.0/4.0, Catia V5 R15, SolidWorks 2007, AutoCAD 2008, UH-NX5, Ansys 10, Agile, Arena, Flex Sim, ProModel.
- **Other:** MS Office Suite, SharePoint, O365, PowerApps, Workday, Zoho, Sage, Key Pay.
